SUMMARY

Passionate and experienced Full Stack Developer with expertise in JavaScript, I am eager to contribute to a company that values innovation and creativity. Demonstrated success in software engineering at Kairosmagus Private Limited reflects my dedication to leveraging technology to drive impactful solutions. Committed to embracing challenges and driving meaningful results in a collaborative environment.

SKILLS

Languages Skills	JavaScript, TypeScript, HTML, CSS
Frontend Skills	Angular, Next.js, ReactJS, TailwindCSS, Bootstrap, Angular Material
Backend	Node.js
Databases	MongoDB, Postgres-SQL
Cloud Services	AWS, Firebase
Version Control	Git / GitHub

EXPERIENCE

Software Engineer	Apr 2022 - (ongoing)
Kairos Magus Private Limited	India, Hyderabad

Responsibilities:

- Worked on various projects, including a health-related project.
- Collaborated with team members to develop and maintain features.
- Continuously improved skills in full-stack development.

Achievements:

- Contributed to a health-related project, resulting in a 25% increase in user engagement.
- Revolutionized the appointment system, managing 500 appointments per month using UI maintenance in Angular and APIs in Node.js user retention by 30% through the development of a payment reminder microservice in Node.js using the node-cron library.
- Implemented tracking of user activity in the application, leading to 40% reduction in user churn.

EDUCATION

Master of Computer Application, Swami Vivekanand Subharti University	2021 - 2022
Bachelor of Computer Application, Swami Vivekanand Subharti University	2018 - 2020

ACHIEVEMENTS

- **Contributed to Health-Related Project**

Contributed to a health-related project, demonstrating dedication to leveraging technology for impactful solutions.

- **Increased User Engagement**

Contributed to a health-related project, resulting in a 25% increase in user engagement.

- **Improved Appointment System**

Revolutionized the appointment system, managing 500 appointments per month using UI maintenance in Angular and APIs in Node.js.

- **Enhanced User Retention**

Increased user retention by 30% through the development of a payment reminder microservice in Node.js using the node-cron library.

- **Reduced User Churn**

Implemented tracking of user activity in the application, leading to 40% reduction in user churn.

STRENGTHS

- **Passionate**

Passionate and enthusiastic about contributing to innovative and creative projects.

- **Experienced**

Demonstrated success and expertise in software engineering and full stack development.

- **Collaborative**

Committed to embracing challenges and driving meaningful results in a collaborative environment.

- **Innovative**

Dedicated to leveraging technology to drive impactful and innovative solutions.
